---

## SUMMARY

Frontend engineer with a strong design eye and hands-on experience shipping web, mobile, and cross-platform products. Translate Figma into polished, performant interfaces in React, Next.js, Flutter, and React Native, from a consumer app on the Play Store to enterprise tooling at Plennix. Focused on clean architecture and shipping things that feel right to use.

## WORK EXPERIENCE

### Frontend Developer, Plennix (Full-time), May 2025 - Present

- Ship Next.js, React Native, and Flutter apps backed by Firebase, including internal tools for operations and product teams.
- Build front-end interfaces on top of Odoo (ERP), bridging design and backend workflows for end-to-end product flows.
- Translate Figma into pixel-accurate, responsive UIs that hold up across mobile and desktop breakpoints.
- Set front-end conventions and review architecture across the team's projects.

### Frontend Developer, Wirestorm Networks (Freelance), Aug 2024 - Present

- Built and maintained Next.js and React apps for clients across retail and services, from kickoff to production.
- Cut average page load through image strategy, code splitting, and route-level caching.
- Improved organic visibility on client sites through on-page SEO, structured data, and Core Web Vitals work.

## PROJECTS

### Recur, Android App, *recur.asaliba.net*

- Designed, developed, and shipped a subscription tracker for Android, end-to-end, available on the Play Store.
- Owned the product solo: from UX and icon design to the Play Store listing and ongoing updates.

### Void, Desktop App (Tauri), *void.asaliba.net*

- Encrypted, local-first notes and file vault for Windows. Built with Tauri, Svelte, and TypeScript.
- Designed and shipped the full product end-to-end: vault UI, rich-text editor, file library, and password-protected encryption (Argon2id + ChaCha20-Poly1305).

## TECHNICAL SKILLS

**Frontend:** Next.js, React, React Native, Flutter, Svelte, Tailwind CSS, HTML, CSS, JavaScript

**Design & Tooling:** Figma, Git, Tauri

**Backend & Databases:** Node.js, Firebase, Supabase, MongoDB

## EDUCATION

**Dual B.S. in Computer Science, Arab Open University (Lebanon) & The Open University (UK), Oct 2020 - Jul 2024**

English (Fluent, British Council Aptis General Certified), Arabic (Native), French (Intermediate)
